Figure 1: **Overall event rate.** Header panel, first line: first event – last event of the period. Second line: good measuring time; time interval between first and last event; total number of events; mean event count per good hour. Middle panel: peak transmitted power in MW (red); the constant transmitted power used in analysis (dashed red); the constant system temperature used in analysis in units of 100 K (dashed cyan). Bottom panel: number of events per hour, with “strong” events ( $\text{ENR} > 400$ ) in blue and “weak” events ( $100 < \text{ENR} < 400$ ) in red.
